Introduction

FORMULARY DRUGS TIER 3 NONPREFERRED

Tier 3 includes all Medicare covered Part D Drugs that are not included in the UPREHS Prime Medicare Plan formulary preferred drug Tiers 1, 2 or 4. Tier 3 drugs are included in the formulary, but are nonpreferred formulary drugs. All Tier 3 drugs that are listed in this book will also list an alternative drug that would be covered in the Tier 1, 2 or 4 Preferred Formulary. Tier 1, 2 or 4 formulary drugs have a lower copayment and will use less of your \$3,000.00 initial coverage limit. Please contact your physician to discuss if the alternative medications would be effective for you. If your doctor approves of you changing to the Tier 1, 2 or 4 alternative preferred formulary drug, then have your physician write you a new prescription to send into your mail order pharmacy Depot Drug.

TIER 3 ALPHABETICAL DRUG LIST

Tier 3 nonpreferred formulary drugs are presented in an Alphabetical drug list only. This is an alphabetical index providing a list of all of the drugs included in the Tier 3. Both brand name and generic alternative drugs are listed next to the Tier 3 drug name. You will also notice a column including the therapeutic class. Look in Tier 3 products column and find your drug alphabetically.
